***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a method of resisting corrosion in concrete ( a method for making concrete), classified in class 106, subclass 640+.
- II. Claims 15-31, drawn to a method of making concrete structures, classified in class 52, subclass 515. Note that claim 19 has been grouped here although it depends from claim 8. The examiner believes that claim 19 should depend from claim 18.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions clearly have different functions and effects since the Group I method produces a cement composition whereas the Group II method produces a concrete structure which is an article.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth D. Wood whose telephone number is 703-308-3802. The examiner can normally be reached on M-F, 5:30-2:00.
